- Do not use the lift
- Follow instructions

## Visitor Information

For Your Safety

### Freising Plant

Besucherinformation - Freising - 02/2020

## Please note the following ...

HAWE Hydraulik SE is committed to the utmost level of security, including for its visitors.

For your own safety, please follow the instructions issued by the host and comply with the following safety rules and information.

By registering at reception and signing the visitors' list, you confirm that you have read and understood the safety rules.

The German Accident Prevention Regulations (UVV) issued by the German Wood and Metal Trade Association (BGHM[Berufsgenossenschaft Holz und Metall]) apply at our plant. These can be viewed upon request.

## Hazard symbols/information

Safety shoes must be worn when leaving the primary routes.

The area is under video surveillance. For further information [www.hawe.com/de-de/unternehmen/werke/freising](http://www.hawe.com/de-de/unternehmen/werke/freising)

The handrail is closed during the to use the stair climbing.

Picture and sound recordings are available in the and on the factory premises. Company documents may only be reproduced after consultation.

Smoking is not permitted in our building and on the plant premises. Please use the designated smoking areas in the inner courtyard.

Entry to designated areas is prohibited to unauthorised personnel.

Individuals with a pacemaker or implant should keep at a distance from designated areas.

Please refrain from touching tools, parts or systems. Coming into contact with operating materials or static electricity poses a health risk and risk of injury.

Warning against automatic start-up of machinery and systems. Always keep your distance from machinery.

Stay alert to the risk posed by industrial trucks. Keep your distance!

Standing under suspended loads is prohibited. Follow the instructions issued by the crane operator.

Our systems and machinery can generate high magnetic forces. Therefore, please keep a minimum distance of one metre away from them.

## Hazardous substances

Containers, apparatus and pipes that come into contact with hazardous substances are labelled. Safety data sheets and directives available for each substance must also be observed. This information is available to view in the individual areas. **If in doubt, please ask one of our staff members or your contact.** The hazard symbols have the following meanings:

applies on its own or in connection with other categories
