

JOB POSTING – Fabrication & Assembly Technician

The Fabrication/Assembly Technician will work with the Operations and Service teams to produce hydraulic power units and other assemblies. We are seeking candidates that have the ability to use technical drawings, written and verbal instructions to lay out and fabricate custom projects. The ideal candidate must be a skilled tradesman that possess problem-solving and reasoning skills and determination to provide quality output.

Location: Clackamas, Oregon

Primary Job Responsibilities:

- Layout, welding, and assembling hydraulic power units and other assemblies according to schematics and other drawings using established HAWE procedures
- Conversion, welding, assembling, and testing of HAWE product accurately and according to quality standards
- Setting up and running performance tests, pumps, motors and valves on the hydraulic test bench
- Engraving new model code plates for newly assembled and/or repaired components
- Inspecting, troubleshooting, and repairing hydraulic components (when required)
- Maintaining the cleanliness and housekeeping of the assembly & test areas
- Supporting the company with a positive attitude and working with customers as needed
- Minimal travel required to customer site and/or for corporate learning (Charlotte, Germany)

Tools:

- QM documentation
- Typegen+ Software
- Electric & Hand tools
- Drilling & Boring machines
- Welding Equipment

Job Requirements

- Stick, MIG, and/or TIG welding capabilities
- Must be able to weld sheet steel in all positions
- Must be able to read and understand hydraulic schematics and blueprints
- Must have a strong knowledge of mechanics and their operations
- Basic computer (Windows-based) skills and MS Office package

Preferred Skills

- Current Welding Certification
- 3+ years of fabrication experience
- Hydraulics knowledge and understanding
